

Vineyards The vineyards are located around Epernay, the capital of Champagne, a world heritage site. The Côte des Blancs, the jewel of the Champagne vineyards, offers the priceless Chardonnay Grand Cru, in the villages of Oger and Chouilly. The Marne Valley offers the Pinot Noir, with its full-bodied and delicate flavors. Winemakers Their family has owned a vineyard for five generations, and has worked with Champagne for several centuries. The Lamiroux family knows that each step is vital to making an exceptional Champagne. The HOXXOH winemaker's philosophy is that you will taste the excellence that nature offers, from the bud to your table. HOXXOH is a Champagne of Winemakers and we are proud to be! Bottles Each of our vintages has a unique design and its own character. It takes nearly an hour to make each bottle entirely by hand. We use noble materials such as gold and natural rubies, giving our Champagne the unique appearance it deserves. With no time constraints, we pay close attention to every detail. Name HOXXOH draws its essence from geometry. No matter how you look at the world, whether you read from left to right, right to left or even with your head upside down, the magic of HOXXOH always occurs. All living beings have the HOX gene, it gives symmetry to our bodies. By putting it in the mirror, we create a symmetry breaker to transgress established codes. Also, if you look closely, you will find the symbol of hydrogen, oxygen and carbon (doubled in the X). The components of the alcohol molecule, dear to our hearts! Our history One August morning, on the French Riviera, we were coming back from a party, just as the pine forests were waking up...The sun draped the sky in sumptuous shades of pink, plunging in a sparkling rain into the turquoise sea. All our senses were awakened, and our hearts were still beating to the rhythm of an unforgettable St Tropez night. With a bottle of champagne in hand, we were happy. How could we make this feeling last forever? How could we keep our minds happy and carefree once we were back home?Spoken as a joke, the answer came quickly: "We should put all these colors in the bottle!". Several years later, we gave rise to the HOXXOH cuvée. It is with great pleasure that we share with you a champagne that makes your taste buds smile, and color your mind! Kind regards, Macha and Grégoire
